Exercise SDJ1

Exercise: Colour, version 2

```
colour

- red : int
- green : int
- blue : int
+ COLOUR NAMES : String[] = { "Black" ...
+ COLOUR CODES : String[] = { "#000000...

+ Colour(red : int, green : int, blue : int)
+ Colour(hex : String)
+ getRed() : int
+ getGreen() : int
+ getBlue() : int
+ toHex() : String
+ getName() : String
+ toString() : String
+ equals(obj : Object) : boolean
```

Create a new module and name it <code>Colour_v2</code> copying the project <code>Colour_v1</code> (or better, the version including the <code>equals</code> method)

Some colours has names, e.g. #000000 is Black, #0000CD is Navy blue and "FFFFFF is White. The list given on the next pages contain the names and corresponding hexadecimal representation for all named colours.

Modify class Colour:

- a) Create a public final static variable COLOUR_NAMES, containing the names for all named colours (type String[]). See the list on the next pages.
- b) Create a public final static variable <code>COLOUR_CODES</code> containing the hexadecimal strings for the named colours (type <code>String[]</code>) such that the colour name at the index in the in the <code>COLOUR_NAMES</code> array represent the hexadecimal representation given at the same index in the <code>COLOUR_CODES</code> array. See the list on the next pages.
- c) Crete a method <code>getName</code> returning the colour name if the hexadecimal representation of the colour can be found the <code>COLOUR_CODES</code> array. If the colour cannot be found in the array, then return the hexadecimal representation instead.
- d) Modify method toString() such that it returns both the colour values for red, green and blue, the hexadecimal representation and the colour name (if any).

Modify the test application named ColourTest such that you test the new added functionality, e.g. a colour object may now be created this way:

| COLOUR NAMES | COLOUR CODES |
|------------------------|--------------|
| "Black", | "#000000", |
| "Navy blue", | "#000080", |
| "Blue 4", | "#00008B", |
| "Medium blue", | "#0000CD", |
